

CSE303: Statistics for Data Science [Summer 2023]

Report on Assignment 01 Data Visualization

Submitted by

Student ID:

Student Name:

1. Introduction

Provide a brief introduction of your Data Visualization Assignment.

2. Dataset Characteristics

In this section, introduce your dataset.

Mention the source of the dataset, what type of data it represents.

Mention the number of rows, columns, and other characteristics.

3. Exploratory Data Analysis

Show all the visualization, i.e., histogram, bar chart, scatter plot and so on, you have created.

Also provide an explanation on each of them. Put Figure number for each visualization.

4. Conclusion

Provide the Link of your Colab Notebook.

What have you learned after finishing this assignment?

Put remarks, comments, challenges, opportunities – anything in this section.
